Trans. of Voprosy Pitaniya (USSR) 1962, v. 21, no. 6,
p. 27-33. (Abstract available)

DESCRIPTORS: *Radiation sickness, *Secretion, *Diet,
Dogs, Fats, *Enzymes, *Gastrointestinal system,
X-rays.

The effects of a diet containing unsaturated fats supple-
mented with pyridoxine were studied. A diet containing
flaxseed oil and pyridoxine caused a 1 1/2 to 2-fold de-
crease in juice secretion during the first 10 to 14 days.
During the next two weeks the amount of juice was about

DESCRIPTORS: *Slip rings, Generators, Turbines,
*Sliding contacts, Brushes, Power equipment.

Investigations carried out on the slip ring brush contact confirm that, in defined conditions between the ring and the brush, there is a wedge-shaped air gap. The tangential dimension of the brush should be as small as possible to lower the aerodynamic lifting force and ensure sparkless operation at high linear velocities of the slip ring. An effective means of improving the operation of a brush slip ring contact with current (Engineering--Electrical, TT, v. 11, no. 2) (over)
